

System Integration and Management Consulting

Today's businesses need partners who can talk about strategy and technology in the same conversation.

At Freewill Solutions we believe that the realization of true value from technology requires an in-depth understanding of business strategy. Our cross-industry consulting services help you craft a vision for your organization and then provide a specific, practical business and technology framework that will make that vision a reality.

The technology management consulting team at Freewill improves the alignment of business and technology through improved process efficiency, reduced cost and enhancement of business value from IT. Our consultants combine extensive technical experience with strong strategic and business focused leadership.

We help our clients in building a high performance IT organization through formalizing the IT strategy, governance metrics, business processes, technology and organization structure needed to deliver and manage efficient, high quality IT services.

We further support our clients in architecture design, business value analysis, asset management, product evaluation and selection, data privacy and security of their IT function.

IT Strategy

Analyse and define IT strategy and roadmap to support strategic business direction and benchmarking external IT trends.

Advise/facilitate clients in the development of documents such "Requests For Proposals" (RFPs), evaluation of tender documents, contract negotiation and post-contract management of consultants/IT vendors.

Systems Integration

Identify, implement and provide life cycle support for hardware and software systems.

Enterprise Resource Planning (ERP) Systems Implementation

Provide full business solutions through the entire project life cycle from package selection through implementation to post-implementation support, including change management and post-implementation review (PIR).

Skillssets include functional subject matter experts (SMEs) plus development and system administration skills. Supported packages include SAP, PeopleSoft, ViryaNet and IBS (Freewill's proprietary accounting solution).

Systems Development and Implementation

Custom application and "bolt on" system design, development, testing, implementation and support.
